(1) @ihr_alerts

main@iij.ad.jp

Monitoring Internet topology for a better understanding of the evolution of the Internet, detecting connectivity issues, and improving resiliency.

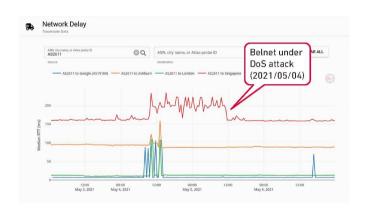

AS dependency

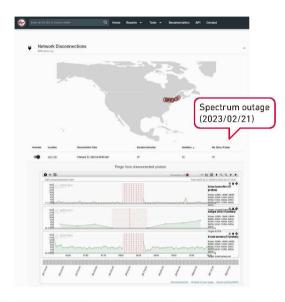

Measuring the inter-dependency of ASes to monitor routing changes and study Internet topology (AS and country-level).

Network delay / Outages

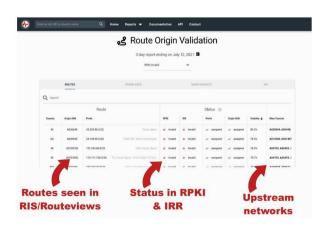

IHR leverages RIPE Atlas data to detect outages and pinpoint delay increases between ASes and geographical locations.

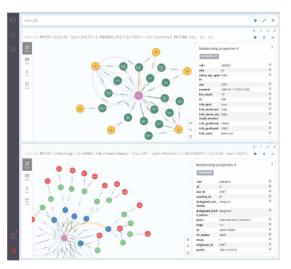

Route Origin Validation

IHR monitors and compares operators' intentions (RPKI/IRR) and actions (BGP).

Internet Yellow Pages

A knowledge graph for Internet resources: 20+ public datasets in one database!

Open Source & Data

IHR source code and datasets are publicly available at:
